Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's amendment filed on 15 October 2004 is acknowledged and entered. Following the amendment, claim 18 is amended.

Currently, claims 12-16, 18, 71, 73-77 are pending and under consideration.

The finality of the rejection of the last Office action is withdrawn. New grounds of rejections are set forth below.

Objections and Rejections under 35 U.S.C. 112:

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 18 remains rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 recites the limitation "*the* CRF2-12" in line 1. There is insufficient antecedent basis for this limitation in the claim. Deletion of "CRF2-12" would be remedial.

Rejections Over Prior Art:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12, 14-16, 18, 73-77 are rejected under 35 U.S.C. 102(e) as being anticipated by Goddard et al., US6,740,520 B2.

Goddard discloses a human polypeptide, PRO19598, which amino acid sequence is 99.7% identical to the present SEQ ID NO:4 (see appended computer printout of sequence search results), comprises amino acids 67-98 of the present SEQ ID NO:4, is a cytokine receptor, and binds to a cytokine in IL-10 family (column 2, lines 39-43). Thus, the reference anticipates claims 12 and 73-77. Although Goddard does not mention explicitly the binding of the receptor to IL-10 or IL-22 (as in the present claims 12, 76 and 77), it would be an inherent property of the receptor as the sequence of Goddard's receptor polypeptide meet the limitation of the present claims. Further, Goddard teaches a fusion polypeptide comprising the receptor polypeptide fused to a heterologous polypeptide such as a Fc region of an immunoglobulin, and a composition comprising the receptor polypeptide and a pharmaceutically acceptable carrier (column 9, the second and the seventh paragraphs; and column 58, the third paragraph). Therefore, the reference also anticipates claims 14-16. Furthermore, Goddard teaches that therapeutic compositions are placed into a container having a sterile access port, for example, an intravenous solution bag or vial having a stopper pierceable by a hypodermic injection needle (column 58, lines 45-48). Thus, the reference anticipates claim 18.

Conclusion:

Claim 13 and 71 are allowable.

Art Unit: 1646
